

# TODAY

Alexandra Gardens not as good visually as when it was first built

Riverside area is dominated by car traffic and parking, harming the visual environment

Town centre has its back to the riverside meaning this beautiful natural resource is under-utilised

Viaduct area is dilapidated

## THE WINDSOR LINK RAILWAY (2)

### RESTORING THE RIVERSIDE AREA

One survey of residents found that most thought the riverside area of Windsor was in need of improvement.

Our vision responding to this is to restore Alexandra Gardens to even better its original vision, reconnecting it with the river and improving views of the castle.

Parking is in short supply in Windsor but is also ugly, dominating what should be a heritage area. Our solution is to move parking away from prominent locations and ideally putting it underground. This would allow the riverside to be better enjoyed.

### OUR VISION

Restore Alexandra Gardens to even better than its former glory and reconnect it with the river

Improve Home Park surrounding

Put 1,600 spaces under Alexandra Gardens meaning the viaduct area can accommodate Georgian style housing
